ANDRII MAKSYMOV

Senior Frontend Engineer | React, Next.js, TypeScript | SaaS & Data Platforms

Rivne, Ukraine | Remote, flexible across US & EU time zones | andrii.maksymov.1@gmail.com | https://linkedin.com/in/maksymov-andrii | https://github.com/andriimaksymov | https://andriim.dev/

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 9 years in web development, building production frontends since 2017, with more than 5 years focused on React, TypeScript, and Next.js. Comfortable both starting new applications from scratch and improving older frontend systems without full rewrites. Work covers customer-facing analytics and data-visualization tools, moving codebases from JavaScript to TypeScript, building reusable component libraries, setting up React Query for data fetching, and adding Playwright end-to-end tests. Usually owns frontend delivery from planning to release, and works well across the stack with Node.js, PostgreSQL, and Prisma in remote, cross-functional teams.

TECHNICAL SKILLS

Frontend Core: React 18/19, Next.js 14/15 (App Router, RSC, SSR/SSG/ISR), TypeScript (strict), JavaScript (ES6+), HTML5, CSS3
State & Data: React Query (TanStack Query), Redux Toolkit, Zustand, WebSockets, REST APIs, GraphQL (basic)
UI & Styling: Tailwind CSS, shadcn/ui, Material UI (MUI), Radix UI, Framer Motion, CSS Modules
Backend & DB: Node.js, Express.js, PostgreSQL, Prisma ORM, Payload CMS
Testing & Quality: Playwright (E2E), Vitest, Jest, React Testing Library, Storybook
Performance: Core Web Vitals, Lighthouse, bundle optimization, code splitting, lazy loading
DevOps & Tooling: GitHub Actions (CI/CD), Vercel, Cloudflare Workers, Docker (basic)
Practices: Agile/Scrum, accessibility (WCAG), SEO, component library design, technical planning
AI-Assisted Dev: Claude Code, Codex, Copilot, Cursor for code review, refactoring, debugging, and test generation

WORK EXPERIENCE

Frontend Engineer | Aivo

Jun 2024 - Present | Remote | Contract | Part-time

- Modernize a live production frontend by adding type safety, better server-state management, and stronger tooling, while keeping feature delivery going at the same time.
- Moved the full legacy JavaScript codebase to strict TypeScript across the main modules, which reduced type-related runtime errors and made the code easier to change.
- Introduced React Query as the standard way to handle server state, which brought caching, loading and error states, and retry logic into one place and removed a lot of manual fetching code.
- Migrated from react-beautiful-dnd to dnd-kit, chosen for its smaller bundle and better accessibility, which restored drag-and-drop support on React 18.
- Refactored Ant Design and SCSS screens into reusable Material UI components for a more consistent and maintainable UI.
- Added unit tests and Playwright end-to-end tests for the five most important user flows, which helped catch issues before merge.

Senior Frontend Engineer | **Movadex**

May 2022 - Jun 2026 | Remote | Full-time

- Built a customer-facing analytics product on top of Metabase data, covering multi-step onboarding, external account integrations, and the full data-visualization layer with dynamic dashboards, configurable tables, and reusable charting logic used across more than 15 dashboard views.
- Shipped React and Next.js applications for international clients across six areas, including analytics, real estate, job search, healthcare, e-commerce, and social impact, and owned the frontend from planning to release.
- Built a B2B platform from scratch with onboarding, client and admin areas, organization and position management, file uploads, and PDF report generation.
- Delivered a Next.js search platform for the German market using SSR and SSG, keeping Lighthouse above 90 and LCP under 1 second with real content load.
- Shipped an e-commerce build on Next.js, Payload CMS, and Stripe, and connected CMS-driven content to the storefront and payment flows.
- Set up a shared component library and code-review practices that the team adopted, which made screens more consistent and cut repeated UI work on new features.

Frontend Engineer (Mid-level) | Rivo Agency

Oct 2021 - Apr 2022 | Rivne, Ukraine

- Worked on an internal CRM system, took part in feature planning, suggested solutions, and added frontend libraries where they improved speed or maintainability.
- Extended a Next.js beauty services platform with new features and refactored the codebase as the product grew.
- Built several Next.js landing pages with Lighthouse scores above 92 and green Core Web Vitals.
- Contributed to Phase 2 of a US B2C application for ValueSoft, Inc., adding frontend improvements and maintaining existing features.

Frontend Developer | PRO-IT

Jul 2017 - Sep 2021 | Rivne, Ukraine

React Developer | *Nov 2020 - Sep 2021*

- Moved from HTML and CSS work into React and Next.js, and built reusable UI components and production-ready customer- facing pages.
- Built a Next.js website for a B2B video-player product that helped customers understand the product and set up integration options.
- Developed an integration page where users could pick video-player settings and generate an embed script for their own websites.

HTML/CSS Developer | *Jul 2017 - Oct 2020*

- Built responsive HTML and CSS markup, email templates, reusable layout patterns, and shared CSS libraries for production websites.
- Worked on a large B2C video-hosting product with a focus on markup, responsive layout, animation, and web performance.
- Built responsive and reusable markup for a custom web video player across desktop, tablet, and mobile, and optimized structure and assets for faster loading and better cross-browser stability.

SELECTED PROJECTS

Pet Life | Full-Stack Pet Health Management Platform

Next.js 15 | TypeScript | PostgreSQL | Prisma | Shadcn UI | Vercel

Live: pet-life-jade.vercel.app | Code: github.com/andriimaksymov

- Built the platform end to end on the Next.js 15 App Router, from relational Prisma schema design to server components, server actions, API layer, and an accessible UI.

JSON UI Forge | Schema-Driven Dynamic UI Builder

React | TypeScript | JSON Schema | Cloudflare Workers (Edge)

Live: json-ui-forge.andrii-maksymov-1.workers.dev | Code: github.com/andriimaksymov

- Engineered a JSON-to-React rendering engine enabling no-code UI generation with dynamic forms, component composition, and runtime layout generation without redeployment.
- Deployed on Cloudflare Workers edge infrastructure for global low-latency access; extensible architecture allows new component types without modifying core logic.

Portfolio Score | Developer Profile Analytics Tool

React | Node.js | GitHub API

Live: portfolio-score-frontend.vercel.app | Code: github.com/andriimaksymov

- Built an automated scoring system that ingests GitHub and LinkedIn data to generate structured, actionable feedback for developers.

EDUCATION & CERTIFICATIONS

National University of Water Management and Natural Resources - M.Sc. in Hydropower Engineering, 2011 - 2017

Certifications: Node.js - MVC, REST APIs, GraphQL (Udemy) | React Testing Library with Vitest (Udemy) | JavaScript: The Advanced Concepts (Udemy)
