

ANDRII MAKSYMOW

Senior Frontend Engineer · React · Next.js · TypeScript · SaaS Platforms · Full-Stack Capable

andrii.maksymov.1@gmail.com · [linkedin.com/in/maksymov-andrii](https://www.linkedin.com/in/maksymov-andrii) · github.com/andriimaksymov · andriim.dev

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8+ years building production SaaS applications and 5+ years focused on React, TypeScript, and Next.js. Equally strong architecting new applications from scratch and modernizing legacy frontend systems without unnecessary rewrites. Experience spans customer-facing analytics and data-visualization UIs, JavaScript-to-TypeScript migrations, scalable component architecture, React Query data-fetching, and Playwright E2E testing — owning frontend delivery from technical planning through release. Comfortable collaborating across the stack with Node.js, PostgreSQL, and Prisma in remote, cross-functional teams.

TECHNICAL SKILLS

Frontend Core: React 18, Next.js 14/15 (App Router, RSC, SSR/SSG/ISR), TypeScript (strict), JavaScript (ES6+), HTML5, CSS3

State & Data: Axios, React Query (TanStack Query), Redux Toolkit, Zustand, SWR, Context API, WebSockets

UI & Styling: Tailwind CSS, shadcn/ui, Material UI (MUI), Radix UI, Framer Motion, CSS Modules, responsive design

Backend & DB: Node.js, Express.js, PostgreSQL (Neon), Prisma ORM, Payload CMS, RESTful APIs, GraphQL (basic)

Testing & Quality: Playwright (E2E), Vitest, Jest, React Testing Library, Storybook, ESLint, Prettier

Performance: Core Web Vitals, Lighthouse, bundle optimization, code splitting, lazy loading, image optimization

DevOps & Tooling: GitHub Actions (CI/CD), Vercel, Cloudflare Workers, Docker (basic), Git, Figma, Jira

Practices: Agile/Scrum, accessibility (WCAG), SEO strategy, component library design, architectural decision-making

AI-Assisted Dev: Claude Code, Codex, Copilot, Cursor — used for code review, refactoring, debugging, test generation, and development acceleration

WORK EXPERIENCE

Senior Frontend Engineer · Movadex

May 2022 - Present | Remote

- Built a customer-facing analytics platform integrating the Metabase API, delivering customizable charts, dashboards, data tables, and reporting capabilities while owning the data-visualization layer end to end.
- Architected and shipped multiple SaaS applications from scratch using React and Next.js, leading frontend delivery from technical planning and architecture through production release.
- Delivered a high-performance Next.js search platform for the German market and the company's marketing website, applying SSR/SSG strategies and Core Web Vitals optimizations to achieve Lighthouse scores of 90+ and sub-1s LCP.
- Built an e-commerce platform using Payload CMS, contributing to content modeling, API integration, and storefront development.
- Led a complete JavaScript-to-TypeScript migration across a production codebase, enforcing strict typing and eliminating entire categories of runtime errors.
- Designed and implemented complex document-management workflows, including PDF editing, rich-text editing with Tiptap, and drag-and-drop interfaces using dnd-kit.
- Implemented real-time multi-user collaboration features over WebSockets with optimistic UI updates, enabling responsive concurrent editing experiences.
- Established automated quality processes through Jest, React Testing Library, Playwright, and GitHub Actions CI/CD pipelines, reducing regressions and improving release reliability.
- Introduced reusable component architecture, frontend standards, and mentoring practices through code reviews and pair programming, improving maintainability and accelerating team delivery.

Middle Frontend Engineer · Rivo Agency

Oct 2021 - Apr 2022 | Rivne, Ukraine

- Developed data-intensive React applications and dashboards using Redux Toolkit and Context API, ensuring efficient state management and responsive user experiences.
- Collaborated closely with product managers, designers, and backend engineers to deliver accessible, responsive interfaces aligned with business requirements.
- Improved code quality through pull request reviews, shared frontend standards, and automated linting workflows, contributing to a more stable codebase.
- Contributed to feature planning, estimation, and implementation discussions to support predictable project delivery.

Frontend Developer · PRO-IT

Jul 2017 – Sep 2021 | Rivne, Ukraine

Junior React Developer · Nov 2020 - Sep 2021

- Built React-based client applications from design handoff through production deployment, focusing on reusable components and maintainable code.
- Integrated third-party services including payment processing, authentication, and external APIs while handling validation, security, and error states.
- Collaborated with senior engineers on application architecture, component design, and feature implementation within agile development teams.
- Improved application usability and performance through component optimization, responsive design techniques, and frontend best practices.

HTML/CSS Developer · Jul 2017 - Oct 2020

- Delivered responsive, cross-browser interfaces for 10+ client projects while maintaining high standards for accessibility, performance, and design accuracy.
- Collaborated with designers and backend developers to transform business requirements into production-ready web experiences.
- Introduced Sass-based styling workflows and modern frontend tooling, improving maintainability and development efficiency across projects.
- Built reusable UI components and responsive layouts following modern web standards and best practices.

SELECTED PROJECTS

[Pet Life](#) · Full-Stack Pet Health Management Platform

Next.js 15 · TypeScript · PostgreSQL · Prisma · Shadcn UI · Vercel

- Designed the relational data schema and backend architecture; implemented server components and server actions on the Next.js 15 App Router.
- Built the project end to end, from Prisma schema design to API layer to accessible UI.

[JSON UI Forge](#) · Schema-Driven Dynamic UI Builder

React · TypeScript · JSON Schema · Cloudflare Workers (Edge)

- Engineered a JSON-to-React rendering engine enabling no-code UI generation supporting dynamic forms, component composition, and runtime layout generation without redeployment.
- Deployed on Cloudflare Workers edge infrastructure for global low-latency access; extensible architecture allows new component types without modifying core logic.

[Portfolio Score](#) · Developer Profile Analytics Tool

React · Node.js · GitHub API · LinkedIn API

- Built automated scoring system that ingests GitHub and LinkedIn data to generate structured, actionable feedback for developers and demonstrate product-thinking and API integration depth.

EDUCATION & CERTIFICATIONS

National University of Water Management and Natural Resources — M.Sc. in Hydropower Engineering · 2011–2017

Certifications: Node.js — MVC, REST APIs, GraphQL (Udemy) · React Testing Library with Vitest (Udemy) · JavaScript: The Advanced Concepts (Udemy)
