

ANDRII MAKSYMOW

Senior Frontend Engineer · React · Next.js · TypeScript · SaaS Platforms · Full-Stack Capable

andrii.maksymov.1@gmail.com · [linkedin.com/in/maksymov-andrii](https://www.linkedin.com/in/maksymov-andrii) · github.com/andriimaksymov · andriim.dev

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8+ years of web development experience and 5+ years focused on React, Next.js, and TypeScript. I build and ship production SaaS interfaces, modernize legacy frontend systems, and raise product quality through solid component architecture, reliable data-fetching patterns, testing, and performance work. I work across remote, cross-functional teams, review code, and support junior developers, owning frontend delivery from technical planning to release. I also bring practical full-stack experience with Node.js, PostgreSQL, Prisma, Payload CMS, and modern cloud deployment tooling.

TECHNICAL SKILLS

Frontend Core: React 18, Next.js 14/15 (App Router, RSC, SSR/SSG/ISR), TypeScript (strict), JavaScript (ES6+), HTML5, CSS3

State & Data: React Query (TanStack Query), Redux Toolkit, Zustand, SWR, Context API, WebSockets

UI & Styling: Tailwind CSS, shadcn/ui, Material UI (MUI), Radix UI, Framer Motion, CSS Modules, responsive design

Backend & DB: Node.js, Express.js, PostgreSQL (Neon), Prisma ORM, Payload CMS, RESTful APIs, GraphQL (basic)

Testing & Quality: Playwright (E2E), Vitest, Jest, React Testing Library, Storybook, ESLint, Prettier

Performance: Core Web Vitals, Lighthouse, bundle optimization, code splitting, lazy loading, image optimization

DevOps & Tooling: GitHub Actions (CI/CD), Vercel, Cloudflare Workers, Docker (basic), Git, Figma, Jira

Practices: Agile/Scrum, accessibility (WCAG), SEO strategy, component library design, architectural decision-making

WORK EXPERIENCE

Senior Frontend Engineer · Movadex

May 2022 - Present | Remote

- Built four large client projects from scratch to production, primarily in React, owning the frontend from technical planning through release.
- Delivered a Next.js project for a German-market search website and built the company's own multi-page marketing site in Next.js, applying SSR/SSG and Core Web Vitals work to reach Lighthouse performance scores of 90+ and sub-1s LCP.
- Built an e-commerce platform using Payload CMS, covering content modeling and the storefront UI.
- Introduced reusable component patterns and shared frontend standards adopted across multiple production projects.
- Reviewed code and supported junior developers through structured reviews and pair programming, raising team-wide quality.
- Built and maintained CI/CD pipelines with GitHub Actions, automating linting, type-checking, testing, and deployment.

Frontend Engineer · Aivo

Jun 2024 - Present | Contract | Part-time | Remote

- Frontend developer on a small cross-functional team (designer, backend engineer, DevOps, product owner) building a multi-year commercial SaaS product with active customers.
- Own the frontend layer: component architecture, the React Query data-fetching layer, and the Material UI design system, replacing legacy CSS with a reusable, accessible component library.
- Led a complete JavaScript-to-TypeScript migration across the codebase, enforcing strict mode and removing entire categories of runtime errors.
- Built a custom document-workflow feature set, including a PDF and rich-text editor (Tiptap) with drag-and-drop interfaces (dnd-kit).
- Implemented real-time, multi-user collaboration over WebSockets with optimistic UI updates for responsive concurrent editing.
- Established unit (Jest / React Testing Library) and end-to-end (Playwright) test coverage, removing classes of regression bugs across releases.

Middle Frontend Engineer · Rivo Agency

Oct 2021 - Apr 2022 | Rivne, Ukraine

- Developed data-intensive React applications and dashboards using Redux Toolkit and Context API, ensuring efficient state management and responsive user experiences.
- Collaborated closely with product managers, designers, and backend engineers to deliver accessible, responsive interfaces aligned with business requirements.
- Improved code quality through pull request reviews, shared frontend standards, and automated linting workflows, contributing to a more stable codebase.

- Contributed to feature planning, estimation, and implementation discussions to support predictable project delivery.

Frontend Developer · PRO-IT

Jul 2017 – Sep 2021 | Rivne, Ukraine

Junior React Developer · Nov 2020 - Sep 2021

- Built React-based client applications from design handoff through production deployment, focusing on reusable components and maintainable code.
- Integrated third-party services including payment processing, authentication, and external APIs while handling validation, security, and error states.
- Collaborated with senior engineers on application architecture, component design, and feature implementation within agile development teams.
- Improved application usability and performance through component optimization, responsive design techniques, and frontend best practices.

HTML/CSS Developer · Jul 2017 - Oct 2020

- Delivered responsive, cross-browser interfaces for 10+ client projects while maintaining high standards for accessibility, performance, and design accuracy.
- Collaborated with designers and backend developers to transform business requirements into production-ready web experiences.
- Introduced Sass-based styling workflows and modern frontend tooling, improving maintainability and development efficiency across projects.
- Built reusable UI components and responsive layouts following modern web standards and best practices.

SELECTED PROJECTS

[Pet Life](#) · Full-Stack Pet Health Management Platform

Next.js 15 · TypeScript · PostgreSQL · Prisma · Shadcn UI · Vercel

- Designed the relational data schema and backend architecture; implemented server components and server actions on the Next.js 15 App Router.
- Built the project end to end, from Prisma schema design to API layer to accessible UI.

[JSON UI Forge](#) · Schema-Driven Dynamic UI Builder

React · TypeScript · JSON Schema · Cloudflare Workers (Edge)

- Engineered a JSON-to-React rendering engine enabling no-code UI generation supporting dynamic forms, component composition, and runtime layout generation without redeployment.
- Deployed on Cloudflare Workers edge infrastructure for global low-latency access; extensible architecture allows new component types without modifying core logic.

[Portfolio Score](#) · Developer Profile Analytics Tool

React · Node.js · GitHub API · LinkedIn API

- Built automated scoring system that ingests GitHub and LinkedIn data to generate structured, actionable feedback for developers and demonstrate product-thinking and API integration depth.

EDUCATION

National University of Water Management and Natural Resources · *M.Sc. in Hydropower Engineering* · 2011 - 2017

CERTIFICATIONS

- Node.js: The Complete Guide - MVC, REST APIs, GraphQL (Udemy)
- React Testing Library with Vitest (Udemy)
- JavaScript: The Advanced Concepts (Udemy - Andrei Neagoie)
