

ANDRII MAKSYMOW

Senior Frontend Engineer · React · Next.js · TypeScript · SaaS Platforms · Full-Stack

andrii.maksymov.1@gmail.com · linkedin.com/in/maksymov-andrii · github.com/andriimaksymov · andriim.dev

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 9 years building production web applications and 5+ years focused on React, TypeScript, and Next.js. Equally strong architecting new applications from scratch and modernizing legacy frontend systems without unnecessary rewrites. Experience spans customer-facing analytics and data-visualization UIs, JavaScript-to-TypeScript migrations, scalable component architecture, React Query data-fetching, and Playwright E2E testing — owning frontend delivery from technical planning through release. Comfortable collaborating across the stack with Node.js, PostgreSQL, and Prisma in remote, cross-functional teams.

TECHNICAL SKILLS

Frontend Core: React 18, Next.js 14/15 (App Router, RSC, SSR/SSG/ISR), TypeScript (strict), JavaScript (ES6+), HTML5, CSS3

State & Data: Axios, React Query (TanStack Query), Redux Toolkit, Zustand, SWR, Context API, WebSockets

UI & Styling: Tailwind CSS, shadcn/ui, Material UI (MUI), Radix UI, Framer Motion, CSS Modules, responsive design

Backend & DB: Node.js, Express.js, PostgreSQL (Neon), Prisma ORM, Payload CMS, RESTful APIs, GraphQL (basic)

Testing & Quality: Playwright (E2E), Webpack, Vitest, Jest, React Testing Library, Storybook, ESLint, Prettier

Performance: Core Web Vitals, Lighthouse, bundle optimization, code splitting, lazy loading, image optimization

DevOps & Tooling: GitHub Actions (CI/CD), Vercel, Cloudflare Workers, Docker (basic), Git, Figma, Jira

Practices: Agile/Scrum, accessibility (WCAG), SEO strategy, component library design, architectural decision-making

AI-Assisted Dev: Claude Code, Codex, Copilot, Cursor — used for code review, refactoring, debugging, test generation, and development acceleration

WORK EXPERIENCE

Senior Frontend Engineer · Movadex

May 2022 - Jun 2026 | Remote | Full-time

- Architected and shipped React/Next.js applications for international clients across six domains — analytics, real estate, job-search, healthcare, e-commerce, social-impact — owning frontend from technical planning through release.
- Built a customer-facing analytics product on top of Metabase data: multi-step onboarding, external account integrations, and the full data-visualization layer (dynamic dashboards, configurable tables, reusable charting logic).
- Built a B2B platform from scratch — onboarding, client and admin areas, organization and position management, file uploads, and PDF/report generation — with React Query as the data layer.
- Delivered a Next.js search platform for the German market using SSR/SSG, holding Lighthouse 90+ and sub-1s LCP under real content load.
- Shipped an e-commerce build on Next.js + Payload CMS + Stripe, wiring CMS-driven content into storefront and payment flows.
- Improved frontend maintainability by introducing reusable component architecture, code-review practices, and clearer implementation patterns across projects.

Frontend Engineer · Aivo

Jun 2024 - Present | Remote | Contract | Part-time

- Modernize a live production frontend — type safety, server-state, and tooling — without pausing feature delivery.
- Migrated the entire legacy JavaScript codebase to strict TypeScript, eliminating a recurring class of runtime errors.
- Made React Query the server-state standard — centralizing caching, loading/error states, and retries previously hand-rolled per component.
- Retired deprecated dependencies, including a react-beautiful-dnd → dnd-kit migration to restore drag-and-drop on React 18.
- Refactored Ant Design / SCSS screens into a reusable Material UI component set, collapsing one-off styling into one system.
- Backfilled unit + Playwright E2E coverage on the 5 most critical flows, turning silent regressions into pre-merge failures.

Middle Frontend Engineer · Rivo Agency

Oct 2021 - Apr 2022 | Rivne, Ukraine

- Worked on an internal CRM system, discussing new features with the team, proposing solutions, and introducing frontend libraries where they improved development speed or maintainability.
- Developed and extended a Next.js beauty-services platform — added new features and refactored the existing codebase for maintainability as the product grew.

- Built several Next.js landing-page sites with strong performance — Lighthouse 92 / green Core Web Vitals across the set.
- Contributed to Phase 2 development of a US B2C application for ValueSoft, Inc., implementing frontend enhancements and maintaining existing functionality.

Frontend Developer · PRO-IT

Jul 2017 – Sep 2021 | Rivne, Ukraine

Junior React Developer · Nov 2020 - Sep 2021

- Moved from HTML/CSS development into React and Next.js work, building reusable UI components and production-ready customer-facing pages.
- Built a Next.js website for a B2B video-player product, helping customers understand the product and configure integration options.
- Developed an integration page where users could select video-player parameters and generate an embed script for adding the player to their own websites.
- Contributed frontend features to the video-player product while working with an existing engineering team.

HTML/CSS Developer · Jul 2017 - Oct 2020

- Built responsive HTML/CSS markup, email templates, reusable layout patterns, and shared CSS libraries for production websites.
- Worked on a large B2C video-hosting product, focusing on markup, responsive layout, animation, and web performance optimization.
- Built responsive and reusable HTML/CSS markup for a custom web video player, supporting desktop, tablet, and mobile devices.
- Created animated and adaptive UI parts for the video player while keeping the markup reusable and maintainable.
- Optimized page structure, styles, and assets to improve loading speed, responsiveness, and cross-browser stability.

SELECTED PROJECTS

[Pet Life](#) · Full-Stack Pet Health Management Platform

Next.js 15 · TypeScript · PostgreSQL · Prisma · Shadcn UI · Vercel

- Designed the relational data schema and backend architecture; implemented server components and server actions on the Next.js 15 App Router.
- Built the project end to end, from Prisma schema design to API layer to accessible UI.

[JSON UI Forge](#) · Schema-Driven Dynamic UI Builder

React · TypeScript · JSON Schema · Cloudflare Workers (Edge)

- Engineered a JSON-to-React rendering engine enabling no-code UI generation supporting dynamic forms, component composition, and runtime layout generation without redeployment.
- Deployed on Cloudflare Workers edge infrastructure for global low-latency access; extensible architecture allows new component types without modifying core logic.

[Portfolio Score](#) · Developer Profile Analytics Tool

React · Node.js · GitHub API · LinkedIn API

- Built automated scoring system that ingests GitHub and LinkedIn data to generate structured, actionable feedback for developers and demonstrate product-thinking and API integration depth.

EDUCATION & CERTIFICATIONS

National University of Water Management and Natural Resources — M.Sc. in Hydropower Engineering · 2011–2017

Certifications: Node.js — MVC, REST APIs, GraphQL (Udemy) · React Testing Library with Vitest (Udemy) · JavaScript: The Advanced Concepts (Udemy)
